and we can arrange a free fire safety review

Head Office: (028) 9045 2297

FIRE RISK ASSESSMENTS

A Guide to Fire Risk Assessments and Selecting a Competent Fire Risk Assessor

What is a Fire Risk Assessment?

An evaluation of your premises in terms of fire safety and risk to life from fire.

Who needs a Fire Risk Assessment?

Every business needs to complete a Fire Risk Assessment. If you have five or more employees you need to record your findings.

Why is it best for your Fire Risk Assessment to be completed by a professional?

An experienced Fire Risk Assessor will give you subjective advice, taking into account cost verses benefit and recommend actions which are reasonably practicable. Compliance ensures your piece of mind, protects your business, employees and visitors to your premises. A valid Fire Risk Assessment is also an essential requirement of your commercial insurance policy.

What are your obligations in selecting a suitable Fire Risk Assessor?

No matter who carries out the Fire Risk Assessment the duty holder or business owner retains the responsibility for

ensuring the adequacy of that assessment. If employing a specialist to undertake the Fire Risk Assessment, whilst you are not expected to be an expert in fire safety you should make reasonable checks to ensure that they are competent to complete the job properly.

How should you select your Fire Risk Assessor?

Your selected company should be 3rd party accredited under a company scheme (BAFE SP205) and your selected assessor on a Fire Risk Assessor Register (IFPO). UKAS Accredited Company Certification Scheme – BAFE SP205 Company Scheme. Professional Body Person Registration Scheme – IFPO Fire Risk Assessors Register.

How can Fire Safety Solutions NI help?

We hold the BAFE SP205 accreditation and have multiple accredited Fire Risk Assessors all around the Province. We have the experience and expertise to protect you and your business providing a cost effective, professional service with the highest level of customer service.

***Don't gamble with your fire safety,
put it in the hands of the professionals***
